PENDANT COLLECTION

Peachtree Ultra Glow Diffusers are made from partially recycled material, allowing for possible additional LEED's points when appropriate. The PLL compact fluorescent lamping offers low energy consumption and ultra smooth illumination.

Due to its unique molecular composition, Ultra Glow produces equal light output with half the lamp wattage of a similar shape made from 3/16" frosted virgin white acrylic. The closed bottoms create a unique appearance over a standard acrylic cylinder. This product offering lends itself to a myriad of grouping choices.

Peachtree Lighting fixtures are all proudly made in the USA.

PEACHTREE ULTRA GLOW

No tools required for re-lamping.

HOWTO SPECIFY
